Tax Anticipation Bills

On February 20 tenders were invited for $1.5 billion, or thereabouts, of tax anticipation bills to be an additional amount of bills dated November 1, 1973, to mature April 19, 1974. The bills were issued March 4. They will be acceptable at face value in payment of income taxes due April 15, 1974. Tenders were opened on February 26.

Tenders received totaled $3,773 million, of which $1,515 million was accepted, including $230 million of noncompetitive tenders. The average bank discount rate was 7.45 percent.

The limit for a noncompetitive tender from any one bidder was $300,000. Payment for the bills allotted could be made through Treasury Tax and Loan Accounts.

52-Week Bills

On February 28, tenders were invited for $1,800 million, or thereabouts, of 364-day Treasury bills to be dated March 12, 1974, and to mature March 11, 1975. The issue was to refund $1,800 million of bills maturing March 12.

Tenders were opened on March 6. They totaled $3,359 million, of which $1,801 million was accepted, including $37 million of noncompetitive tenders. The average bank discount rate was 6.897 percent.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in February totaled $17.2 billion. These issues were offered for cash and in exchange for bills maturing in a like face amount. There were four 13-week issues of $2.5 billion and four 26-week issues of $1.8 billion. Average rates for the new issues are shown in the following table.

Date of issue	Annual average rate (bank discount basis)	
1974	13-week	26-week
Feb. 7	6.951	6.747
14	7.080	6.881
21	7.019	6.787
28	7.187	7.081

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $10,000, $15,000, $50,000, $100,000, $500,000, and $1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches. Each tender must be for a minimum of $10,000. Tenders over $10,000 must be in multiples of $5,000.

Noncompetitive tenders (without stated price), usually for $200,000 or less from any one bidder, for each issue of 13-week, 26-week, and 52-week bills, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, and 52-week bills may not be made by credit in Treasury tax and loan accounts.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Foreign Series and Foreign Currency Series

Foreign series securities issued in February totaled $5,240 million, consisting of twelve certificates of indebtedness. Redemptions for the month totaled $5,234 million. At the end of February, foreign series securities outstanding totaled $23,762 million. (Details are on page 62.)

Foreign currency series securities issued in February consisted of two notes denominated in Swiss francs equivalent to $68 million. Redemptions for the month totaled an equivalent of $67 million. At the end of February foreign currency series securities outstanding totaled an equivalent of $1,589 million and were all denominated in Swiss francs. (Details are shown on page 65.)

1/ Collections in the various States do not necessarily indicate the Federal tax burden of the respective States, since the taxes collected in one State are, in many instances, borne by residents of other States. For example, the withholding taxes reported by employers situated in metropolitan areas near State boundaries include amounts withheld from salaries of employees who reside in neighboring States.

2/ Includes old-age, disability, and hospital insurance taxes on self-employment income.

3/ Includes tax on unrelated business income of exempt organizations.

4/ Consists of estate, gift, and excise taxes; excise taxes on imported items deposited by collectors of customs; and amounts collected on Puerto Rican products coming into the United States.

5/ Includes District of Columbia collections.

6/ Consists of collections from U.S. taxpayers in Puerto Rico, Canal Zone, etc., and in foreign countries.

7/ Tax payments made to banks, under the Federal tax deposit system or the prior depositary receipts system, are included in the internal revenue collections for the period in which the Federal tax deposit is purchased or the depositary receipts were issued. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise tax payments relate) until the Federal tax deposit payment is applied to the taxpayer's liability in the internal revenue offices or the depositary receipts are received in the Internal Revenue offices with tax returns.

8/ Represents credits allowable on income tax returns for certain gasoline and lubricating oil tax payments and for excess Social Security payments under the Federal Insurance Contributions Act (FICA).

9/ Withheld taxes covered into the Treasury of Guam (48 U.S.C. 1421h).

10/ Net transactions in the clearing account on the central books of the Treasury for income taxes withheld from the salaries of Federal employees. * Less than $500.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget presentation and therefore may differ somewhat from the Budget document.)

Gross obligations incurred (as above)	$196,259
Deduct:	
Advances, reimbursements, other income, etc.	38,235
Offsetting receipts	21,764
Net obligations incurred	$136,260

ACCOUNT OF THE U.S. TREASURY

Source and Availability of the Balance in the Account of the U.S. Treasury

The working cash of the Treasury is held mainly in Treasury's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1973, pages 282-285.

urce: Daily Statement of the United States Treasury.
te: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
2/ On United States savings bonds the rate to maturity is applied against the amount outstanding. r Revised.

Table FD-9. - Status and Application of Statutory Limitation

Public Law 93-173 provides that beginning on December 3, 1973, and ending on June 30, 1974, the public debt limit shall be temporarily increased by $75.7 billion.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G,H, and K are included at face value throughout.

Matured bonds which have been redeemed are included in redemptions.

Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957; (2) Series F and J bonds for Series H bonds beginning January 1960; and (3) U.S. savings notes for Series H bonds beginning January 1972; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.

Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemption. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

8/ Includes exchanges of Series 1960 F and G bonds for 3-7/8% marketable bonds of 1968.

9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

* Less than $500,000.

TREASURY SURVEY OF OWNERSHIP, JANUARY 31, 1974

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 80 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 40 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

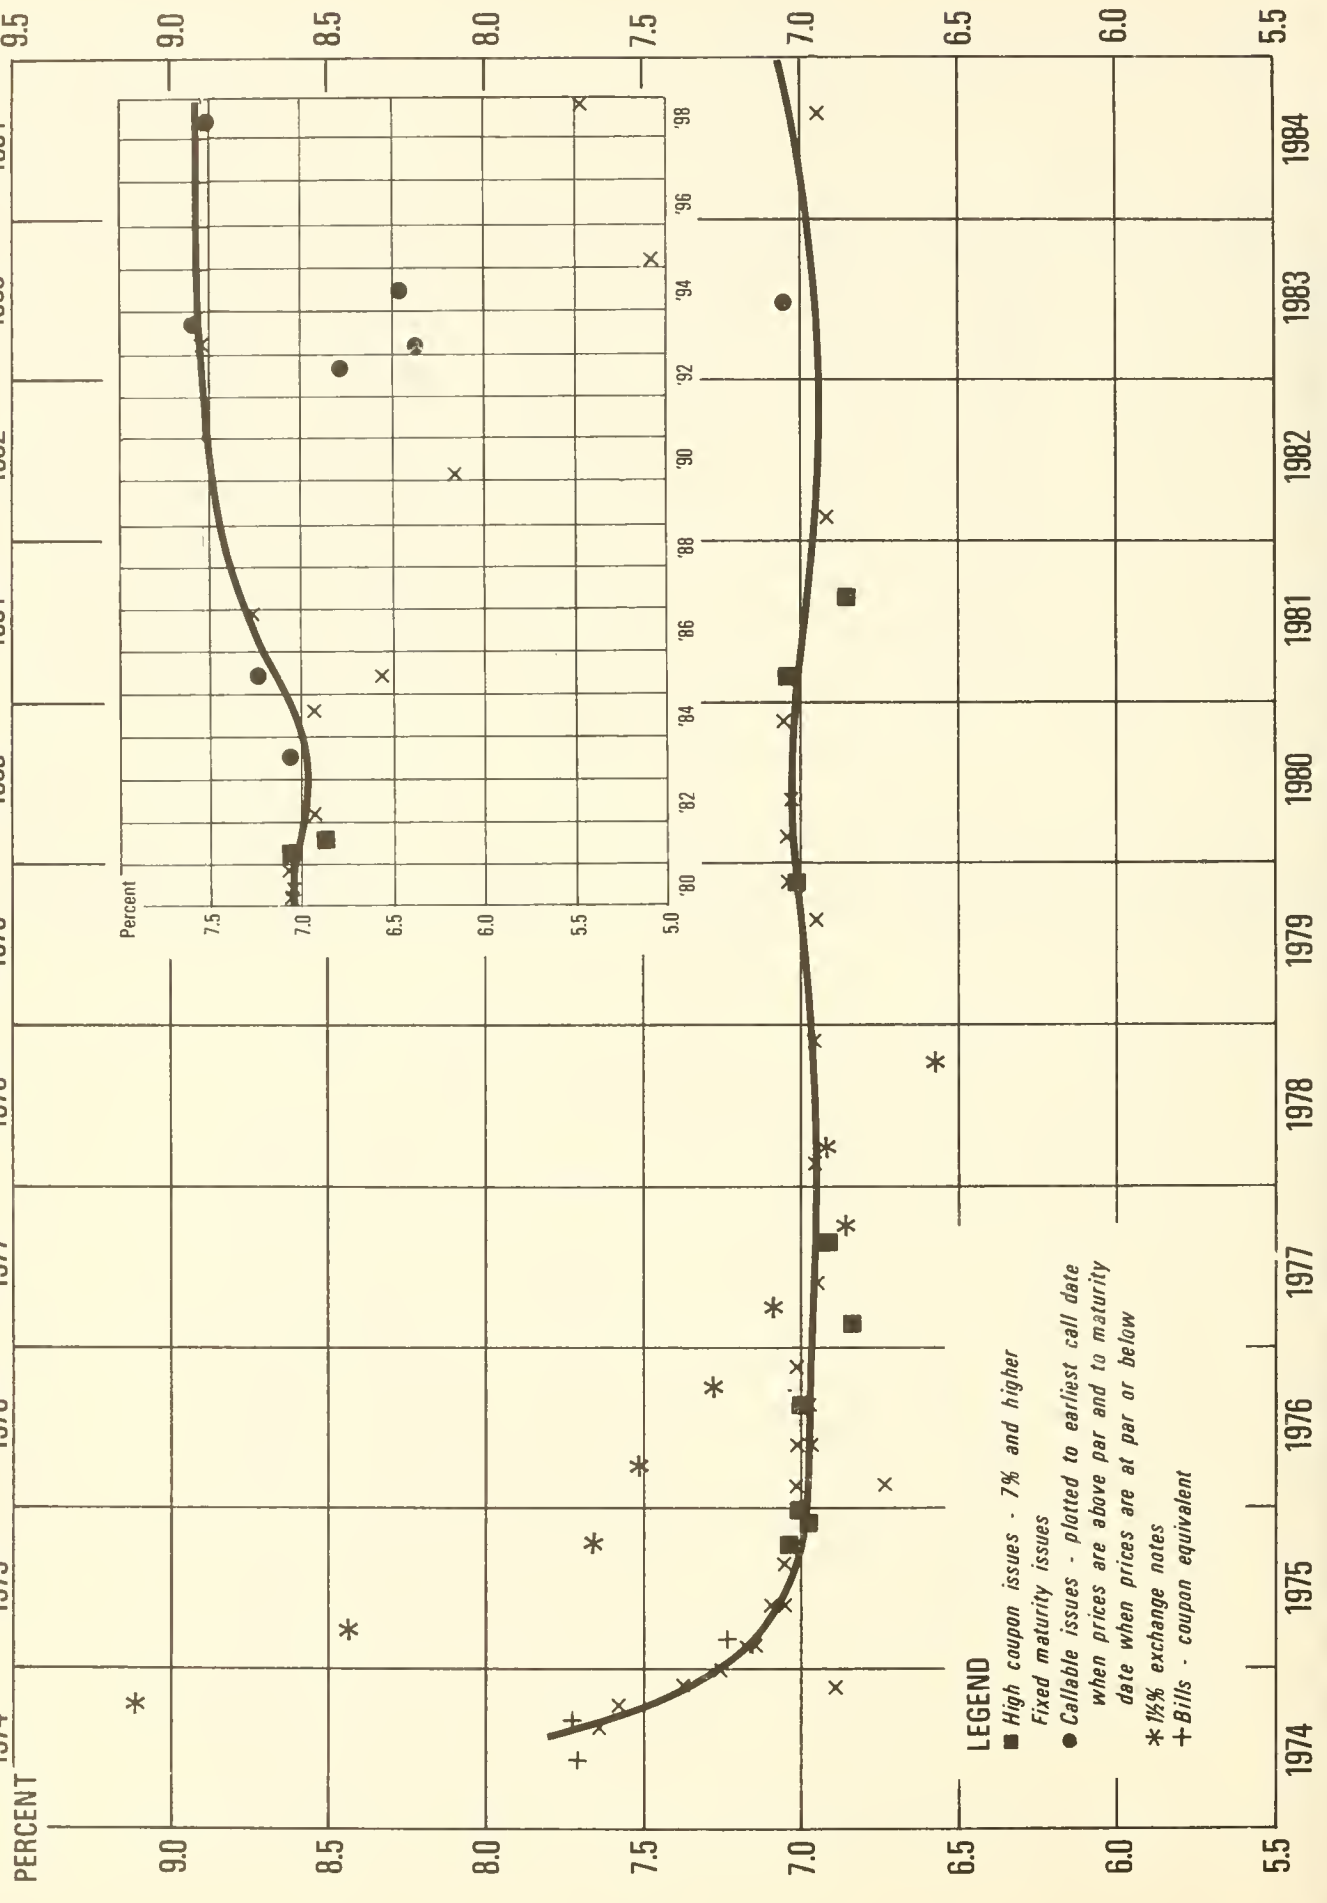
1/ Beginning April 1953, prices are closing bid quotations in the over the counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

2/ On callable issues market convention treats the yields to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long term taxable Treasury Bonds as shown under "Average Yields of Long Term Bonds."

YIELDS OF TREASURY SECURITIES, FEBRUARY 28, 1974

Based on Closing Bid Quotations



Note: The smooth curve is fitted by eye. Market yields on coupon issues due in less than 3 months are excluded.

1/ Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MO-3.

2/ Treasury series based on reoffering yields of new corporate bonds with 5 years call protection and rated Aa by Moody's Investors Service. Prior to June 1973, this series reflected bonds without call protection. The value of 5 years call protection in that period ranged from 10 to 25 basis points.

3/ Index of new issue reoffering yields on Aa 20 year general obligations complied by Securities Industry Association. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

AVERAGE YIELDS OF LONG-TERM TREASURY, CORPORATE AND MUNICIPAL BONDS

*Change in Aa compution method effective June 1973, See footnote 2 following table AY-1.

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 and July 1972 issues of the Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liquid and nonliquid liabilities to foreign official institutions, and liquid liabilities to all other foreigners, which are used in the United States balance-of-payments statistics.

Table IFS-3 presents an area breakdown of United States liquid and nonliquid liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of non-marketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in debt securities of U.S. Federally-sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by other international and regional organizations.

1/ Includes liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the Fund under quota increases, and U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.

2/ Includes Bank for International Settlements and European Fund.

3/ Derived by applying reported transactions to benchmark data: breakdown of transactions by type of holder estimated 1960-1963.

4/ Includes long-term liabilities reported by banks in the United States and debt securities of U.S. Federally-sponsored agencies and U.S. corporations.

5/ Excludes notes issued to foreign official nonreserve agencies.

Note: The initial U.S. quota in the International Monetary Fund was $2,750 million. The U.S. quota was increased to $4,125 million in 1959, $5,160 million in February 1966, and $6,700 million in December 1970, and revalued to $7,274 million in May 1972 and $8,083 million in October 1973 as a result of changes in the par value of the dollar. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposits or gold investment (see Table IFS-2).

2/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

3/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.

4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts equal to the United States quota.

5/ Includes $259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

6/ Includes $30 million of special drawing rights.

7/ Represents amount payable in dollars to the Fund to maintain the value of Fund holdings of U.S. dollars.

* Less than $500,000.

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated, and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of $500,000 is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is $100,000.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are $500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of $1 million or more. The foreign credit and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is $100,000.

Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Statistical Reports, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D. C. 20220 or from Federal Reserve Banks.

1/ Includes Bank for International Settlements and European Fund.

2/ Short-term U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold was reacquired by the International Monetary Fund.

3/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank. Includes difference between cost value and face value of securities in IMF gold investment account ($14 million at end 1971).

4/ In addition, IMF gold investment included investments in U.S. Government bonds and notes which amounted to $109 million at end 1960, $187 million at end 1961, and $61 million at end 1963.

5/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

6/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks" and a number of reporting banks are included in the series for the first time.

7/ Second line includes $7 million increase in dollar value of foreign currency obligations revalued to reflect market exchange rates as of Dec. 31, 1971.

8/ Includes $15 million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates.

1/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

2/ Data on the second line differ from those on the first line because those claims of U.S. banks on their foreign branches and those claims of U.S. agencies and branches of foreign banks on their head offices and foreign branches which were previously reported as loans are included in "other short-term claims"; and a number of reporting banks are included in the series for the first time.
